

Custom Coils for commercial, industrial and institutional applications

THE SUREFIN SUPERIOR QUALITY ADVANTAGE

Direct Expansion Coils

Heating/Cooling Coils

Steam Coils

Condenser Coils

SUREFIN - CUSTOM COILS FOR COMMERCIAL, INDUSTRIAL & INSTITUTIONAL APPLICATIONS

SUREFIN is a leading coil manufacturer, serving the marketplace with superior quality custom coils and accessories for commercial, government, industrial and institutional applications as well as military installations. Industrial, institutional and process applications often demand special, unique, including Six Sigma requirements. Whether your application coil needs are for heating or cooling, evaporating, condensing, booster or tube bundles, discover the superior quality advantage of SUREFIN coils.

SUREFIN - FLEXIBLE, COST EFFECTIVE SOLUTIONS

Existing Applications. Our proven experience affords the manufacturing capabilities to duplicate an existing performance with a unit or application to accommodate your current physical infrastructure, eliminating costly structural changes and unnecessary piping reconfigurations.

Replacement or New Installations. We offer unusual connection replacement(s), asymmetrical casings, built-in drains pans, design options, variety of materials and an array of corrosion protection coatings to meet special requirements.

Custom Applications. Along with standard coils, we specialize in custom coils for engineered applications. Our recognized expertise, enhanced by our engineering capabilities and manufacturing technologies allows us to properly apply and provide a flexible, cost effective solution for your custom coil applications.

SUREFIN - SUPERIOR QUALITY ADVANTAGE

Our People. The foundation of our SUREFIN superior quality advantage is our seasoned engineers and skilled artisans. With over 30 years experience, SUREFIN's superior quality advantage is first designed and engineered by our seasoned craftspeople, and supplemented only by technology and robotics.

Our Process. Our processes are designed to assure SUREFIN products are built to meet or exceed American Refrigerant Institute (ARI) standards. Each coil is Quality Assurance (QA) inspected and hydraulically tested at 300 PSIG to ensure leak free qualities. SUREFIN has the experience and capabilities to meet stringent Department of Defense Index of Specifications and Standards. (DODISS).

Our Products. SUREFIN's commitment to superior quality advantage is demonstrated in the pride we take in producing superior quality products by using heavier gauge materials than industry standards. This ensures a longer working life for your SUREFIN coils, maximizing value and enhancing your returns. In addition, SUREFIN coils are superior quality designed and engineered for top performance.

SUREFIN - ENGINEERED FOR TOP PERFORMANCE

Designed and Engineered for Performance. Our tubes are staggered on multiple rows for optimal transfer, with flat plate fins for minimal pressure drop and fin spacing from .04 - .16 inch. The headers of seamless copper tubing with spun ends and extruded collars eliminates the need for end discs, providing desirable brazing surface. As a SUREFIN superior quality advantage, all joints on our SUREFIN coils are brazed with silver bearing solder.

MATERIALS

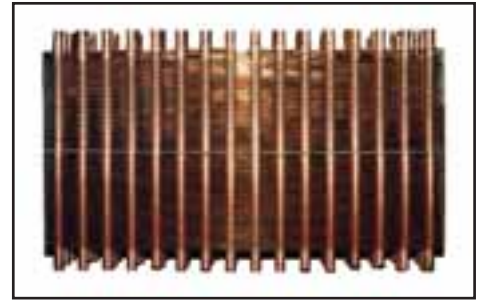

SUREFIN offers a variety of materials and options:

- Fins – copper, aluminum, cupro-nickel, steel, stainless, steel.
- Tubes and headers – coppers, stainless steel, red or admiralty brass, carbon steel, cupro-nickel.
- Frames – galvanized steel, stainless steel, aluminum, brass, copper.
- Coatings – corcheck, sil-flex, heresite for corrosion protection.

DELIVERY

SUREFIN strives to accommodate business needs:

- Our standard delivery is 4 to 6 weeks on custom applications.
- Quick shipment times from 24 hours to 10 working days.
- 24 hour Emergency Service and Repair Work is available.

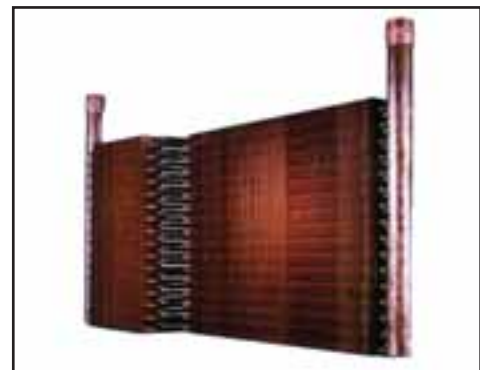

Copper Coils for Air Compressor application.

Coils for use in government installations. Superior quality constructed to satisfy stringent DODISS standards.

Dryer Coils made of stainless steel construction for use in corrosive environments. Available in cupro-nickel and copper.

Dryer Coils with offset connections. Replacement design for bent tubes.

OTHER PRODUCTS OFFERED BY SUREFIN

Air Handling Units

Shell & Tube Replacement Bundles

Bypass Heating Coils

Repair & Testing Services are also available.
